

SCHOLARSHIP ACTIVITIES SPONSORSHIPS

The Interservice/Industry Training, Simulation and Education Conference (I/ITSEC) is honored each year to present the National Training & Simulation Association (NTSA) **Thirty-Fourth Annual RADM Fred Lewis Postgraduate Scholarships** and **Seventh Annual Leonard P. Gollobin Postgraduate Scholarship**.

In addition, NTSA manages the **Annual Barbara McDaniel Undergraduate Scholarship** program, implemented in 2019. The scholarship does not follow the postgraduate scholarship submission process. The NTSA scholarship committee pre-selects three academic institutions and those three institutions select up to two undergraduate students for a scholarship award.

NTSA understands the importance of students pursuing Modeling & Simulation degrees and how vital it is to the modeling, simulation, and training (MS&T) industry. These scholarship awards will keep the MS&T workforce pipeline filled, starting at the Undergraduate level.

The scholarship recipient(s) will attend I/ITSEC 2023 (27 November – 1 December 2023) at the expense of NTSA, where they will be recognized at a special scholarship awardee and alumni reception and meet leading figures from government, industry, and academia associated with this community. If you would like to help support this very worthy program, please consider being a sponsor for the Scholarship Activities at I/ITSEC. We have several levels of support that will fit your budget and contribute a huge benefit to all recipients past and present.

GOLD

\$2500

- Recognition on signage for the event and other various sponsor signage
- Recognition from the podium at the event
