

# WHY A NTSA TOP 10 UNDER 40?

**NTSA TOP 10 UNDER 40** will provide a valuable recognition to our next generation of leaders in the I/ITSEC Community. A Top Under 40 is an exceptional leader, contributor, and volunteer to the modeling, simulation, and training (MS&T) community, and has achieved significant professional success early in their career. The Top Under 40 recognized leaders are those who are having an impact in our community who we are very proud of. These leaders will help keep our community vibrant and relevant for years to come.

## THE TOP 10 UNDER 40 COMMITTEE

will evaluate nominations using the following criteria:

**Volunteerism impact in the MS&T community.** The committee will be treating as more favorable, impact beyond ones role within their respective companies and impact towards the greater good of the MS&T community.

**Professional impact in the MS&T community.** The evaluation committee will be looking for one's impact to the MS&T community while in the performance of their professional roles in their respective companies or organizations.

**Leadership Impact.** The evaluation committee will recognize all examples of exceptional leadership regardless of community supported. The community is looking for examples of leadership attributes in action resulting in high impact.

If you would like to support this initiative and helped build the future of the M&S community, please consider being a sponsor.
