THE CALL

The innovations and technologies presented annually at I/ITSEC have great potential to support our nation’s warfighters and the service men and women of our international partners. In addition to the vast show floor, which highlights the best of our industry’s leading-edge technical developments, I/ITSEC provides an opportunity for the global modeling and simulation community to come together and collaborate. The conference offers many venues for attendees to engage such as technical paper presentations, special events, tutorials and professional development workshops. Through these avenues, members from government, industry, and academia can discuss our most pressing challenges and how to go about solving them.

This year’s theme: “Sustaining a Global Force in a Digital World” directs our community to consider how to be a human in digital environments, and how digital technologies can support global military readiness. Advancements in digital engineering, data science, extended reality, and evaluation and assessment methods provide a means to create effective and sustainable solutions for an uncertain future. We have the chance to understand how these digital advancements can improve future designs for training systems, training engagements, and methods used to verify and validate them. We are also challenged to view sustainability from the multi-domain operational environment, and how disruptive technologies can deliver a future capability today. Overall, these technologies can help us to recruit, train, and sustain a strong military in a future of uncertain threats.

We therefore call on those from modeling & simulation, training, education, and acquisition communities to contribute to the I/ITSEC 2023 program by submitting an abstract to one of the program elements listed below. Your contributions are a vital element of this conference—we look forward to hearing your best ideas and thank you for your contributions.

ELIOT WINGER, PH.D.
2023 Conference Chair

ANNE LITTLE, PH.D.
2023 Program Chair

IMPORTANT DATES

Instructions for each step will be posted at least two weeks before the process opens.

THE CONFERENCE

The Interservice/Industry Training, Simulation and Education Conference (I/ITSEC) is the world’s largest modeling, simulation and training event. Held near the beginning of December in Orlando, Florida, USA, I/ITSEC consists of peer-reviewed paper presentations, tutorials, special events, professional development workshops, a commercial exhibit hall, a serious games competition, and STEM events for teachers and secondary students. I/ITSEC is organized by the National Training and Simulation Association (NTSA), which promotes international and interdisciplinary cooperation within the fields of modeling and simulation (M&S), training, education, analysis, and related disciplines at this annual meeting. The NTSA is an affiliate subsidiary of the National Defense Industrial Association (NDIA). Hence, I/ITSEC also emphasizes themes related to defense and security.

I/ITSEC is an annual forum for representatives from the military, industry and academia to connect and share knowledge. The conference draws 16,000 attendees from industry, government and academia, and features over 450 exhibits. The United States Army will serve as the lead service for I/ITSEC 2023 in partnership with all military services.

PAPERS

The I/ITSEC 2023 Conference Committee invites you to submit previously unpublished work and especially encourages original papers that align with the theme and concepts described in The Call. Prospective authors are encouraged to read through the Subcommittee descriptions (see next page) and submit abstracts for papers that discuss the core research our industry will use to prepare the global force for the digital world. All paper presentations will be offered for Continuing Education Units (CEUs).

PAPER PROCESS

The complete three-stage process for submitting papers is detailed in the I/ITSEC Author’s Handbook (available for download from the Authors section of the I/ITSEC website). The initial stage in the process is the submission of an abstract.

ABSTRACTS (Stage P1). As a prospective author, your chances of having an abstract accepted are significantly greater if you send your abstract to the appropriate subcommittee, so please read the descriptions carefully. It is also vital that you submit your abstract on time. Please refer to www.iitsec.org for additional details.

PAPERS (Stage P2). If your abstract is selected for expansion into a paper, you will be assigned a bird dog, who will be your liaison to the subcommittee and the champion for your paper. Your chances of having your paper accepted are significantly greater if you work closely with your bird dog. Papers are accepted for both publication in the conference proceedings and presentation at the conference. The selection process includes a Best Paper nominee from each subcommittee that will be considered for the overall conference Best Paper. Detailed instructions for completing and submitting your paper will be available on the I/ITSEC website.

PRESENTATIONS (Stage P3). If your paper is accepted, you are required to submit a presentation for review prior to the conference. Presentations should be designed for a 20 minute time-slot, plus five minutes for questions and answers. Detailed requirements for the presentations will be available on the I/ITSEC website.

TUTORIALS

2023 CHAIR: MICHAEL J. O’CONNOR

I/ITSEC presents a comprehensive tutorials program covering a diverse set of topics essential to the simulation, training, and education communities. Each tutorial is focused on building skills and provides an opportunity to earn CEUs. Tutorials are 90 minutes in length.

The tutorial program provides learning opportunities in two focus areas:

1) FOUNDATIONAL topics related to skills and knowledge required by practitioners in the I/ITSEC community. This includes topics to prepare for or maintain certification as a Certified Modeling and Simulation Professional (CMSP).

2) EMERGING and INOVATIVE concepts of particular interest to I/ITSEC attendees that provide skills in new and evolving technologies.

TUTORIALS PROCESS

The complete three-stage process for submitting tutorials is detailed in the I/ITSEC Author’s Handbook, available for download from the Author Information page of the I/ITSEC website (under “Get Involved”).

PROPOSAL (Stage T1). As a prospective tutorial presenter, you must submit a complete tutorial proposal including an abstract, detailed outline, intended audience, any prerequisites, and targeted learning objectives. Learning objectives are critical to the Tutorial Board’s selection process. The Board also assesses the degree to which proposal topics will contribute to a comprehensive tutorial curriculum encompassing the two focus areas described above.

PRESENTATIONS (Stage T2). If your abstract is selected for expansion into a complete tutorial presentation, you will be assigned an I/ITSEC bird dog who will be your liaison to the Tutorial Board and the champion for your presentation. You must submit a complete set of presentation slides to the Tutorial Board for review.

FINAL PRESENTATIONS (Stage T3). If your presentation is selected, you will receive feedback from the Tutorial Board and then have the opportunity to submit a revised and final version of your tutorial presentation.

PROFESSIONAL DEVELOPMENT WORKSHOPS

2023 CHAIR: BENJAMIN BELL, PH.D.

This conference seeks workshop proposals that offer in-depth and interactive engagement with innovative concepts, technologies and use cases exploring effective training and readiness. Workshops are half-day events. Topics should be of general interest to the I/ITSEC audience across the broad categories of training, education, human performance, and simulation, and should propose an in-depth treatment of a topic of current relevance or that is an emerging capability. Submissions from individuals and organizations outside of the traditional boundaries of the defense industry are welcomed. Proposals should describe the general topic for the workshop and a high-level outline of how the workshop would be conducted. Workshops with a thematic connection to a Tutorial are also encouraged as paired events.

We are pleased to continue to offer the “one per paper” and “two per tutorial or Professional Development Workshop” complimentary registrations at I/ITSEC. After Stage P2 and T2, authors will be notified and provided instructions for taking advantage of this benefit. This is a full registration, to include access to all Tutorials, Papers, Special Events, Professional Development Workshops, Exhibit Floor access during open hours, Meals, and Meeting Materials.
and where possible, characterize innovative processes or techniques to improve qualitative and/or quantitative analysis of data to help substantiate outcomes; for acquiring, implementing, and sustaining these capabilities. Papers should present innovative intellectual property solutions that support maintenance and competition across the education, training and simulation industry.

EMERGING CONCEPTS & INNOVATIVE TECHNOLOGIES
2023 CHAIR: BRIAN STENSRUD
This subcommittee seeks papers that discuss emerging and innovative technologies, methodologies, or concepts associated with simulation and data analysis, training, education, and support to operations across the spectrum of government, industry, and academia. Papers should clearly explain how the topic advances the state of the art and has relevance in defense, transportation, homeland security, medical training, law enforcement, cyber security, or other areas. Examples of new and emerging topics include artificial intelligence and machine learning concepts, XR applications including the metaverse, digital twins, and data analytics. Candidate papers should thoroughly describe the challenges encountered and associated creative solutions implemented to overcome them. Submissions that simply describe applications or instantiations of known technologies are discouraged. Rather, this track emphasizes unique and emerging concepts that inspire and can provide a conceptual and scientific basis for future applications that benefit DoD training, simulation, and education.

HUMAN PERFORMANCE ANALYSIS & ENGINEERING
2023 CHAIR: JASON BEWLEY
This subcommittee seeks papers that focus on the human dimension — systematically addressing individuals and teams as an integral component within workplace systems. Papers should address the application of human performance analysis & engineering (HPAE) technologies, human performance measurement and effectiveness models, methods and tools, human-computer interaction (HCI), usability/user experience (UX), decision/performance support systems, and the impact of HPAE on organizational outcomes. Specifically, the subcommittee seeks papers that describe how particular interventions — including XR, human-machine teaming and others — leverage and extend the capabilities of an individual and/or a team, and improve learning transfer and operations. Papers supported by human performance data gathered from scientifically valid experiments are especially valued.

POLICY, STANDARDS, MANAGEMENT & ACQUISITION
2023 CHAIR: PHILIPPE PEREY
This subcommittee is seeking papers related to policy and standards issues associated with the acquisition, implementation, and maintenance of education, training, and simulation capabilities. This includes policy-related topics regarding training systems development and associated content, delivery, and sustainment. Papers are sought that provide insight into innovative approaches for managing requirements for acquiring, implementing, and sustaining these capabilities. Papers should provide qualitative and/or quantitative analysis of data to help substantiate outcomes; and where possible, characterize innovative processes or techniques to improve return on investment. Papers may address emerging policy, standards, or the need for policy or standards with respect to education, training, simulation, data analytics and cybersecurity. Topics of particular interest for the current year include emerging concepts in policy and standards, including Other Transaction Authority (OTA) implications to the training and simulation communities, sustainability, and outcome-focused approaches to training and simulation acquisition, development, execution and evaluation. The PSMA subcommittee also has a continuing interest in papers that address innovative intellectual property solutions that support maintenance and competition across the education, training and simulation industry.

SIMULATION
2023 CHAIR: MARTIN BINK, PH.D.
This subcommittee seeks innovative papers on the applied science of modeling and simulation, simulation architectures or techniques, as well as the exploration of synthetic entities or environments and how they apply to training, mission rehearsal, analysis, experimentation or research. Papers should present and explain concepts, theories or applications that bring innovation to the modeling and simulation enterprise. Discussions should detail the technical challenges, past lessons, unique and creative developments associated with developing, interacting with, and maintaining simulation systems. Topics of interest include evolving modeling and simulation technology, expanding interoperable simulation architectures, realistic human behavioral modeling, medical simulation, replication of cyber effects, and innovation in representing physical entities and behavioral actions within live, virtual, constructive, mixed reality and gaming environments.

TRAINING
2023 CHAIR: ALEXANDRA STEINER, PH.D.
This subcommittee seeks papers that discuss the application of innovative concepts, methods and technologies to create effective training solutions. Papers should present a clear problem description, state-of-the-art from current literature, analysis of current needs and training gaps, and practical application. Example topics include adaptive training, training system integration and interoperability, training applications of artificial intelligence or machine learning, individual and collective team training, learning science or learning engineering, innovative training strategies, and competency-based training and assessment. Descriptions of implemented solutions’ effectiveness supported by quantitative and/or qualitative data are encouraged. Emerging technologies of interest include augmented reality and virtual training environments, semi-automated training and assessment generation, mobile training, and training techniques to deal with rapidly changing or austere conditions. The subcommittee is interested in all phases of training system development including planning, analysis, design, development, deployment, and evaluation, and lifecycle maintenance.

The Interservice/Industry Training, Simulation and Education Conference (I/ITSEC) is pleased to announce the Thirty-Third Annual RADM Fred Lewis Postgraduate Scholarships and Gollobin Award. The Lewis Scholarships are being offered at a Masters level in the amount $5,000, and at a Doctoral level in the amount of $10,000. From the pool of applicants to the RADM Fred Lewis I/ITSEC Postgraduate Scholarship Recipients, one will be selected for the Gollobin Award. The scholarships are being offered to stimulate student interest and university participation in preparing individuals for leadership in the Modeling & Simulation, Training and Education communities. By investing in our future workforce, the Lewis Scholarships and Gollobin Award encourage expansion of the I/ITSEC community and promote innovation through direct investment in our community’s future leaders. In the event that suitable candidates for one level are not identified, funds may be combined to provide two awards at the same level of study. The scholarship recipient(s) will attend I/ITSEC 2023 (27 November – 1 December 2022) at the expense of NTSA, where they will be recognized; view the latest in simulation, training, and education technologies; and meet leading figures from government, industry, and academia associated with this community.

ELIGIBILITY
The applicant must be a U.S. citizen and successfully complete undergraduate studies by the end of Spring Term 2024. The applicant also must be enrolled or accepted for a full-time masters or doctoral program at a U.S. Institution with a focus in any of the following areas:
• Engineering (Modeling, Simulation and/or Training Related)
• Operations Research/Systems Analysis/Mathematics
• Distance Learning Methodologies
• Human Factors (Psychology or Engineering)
• Instructional Design and Training Methodology
• Computer Science and/or Information Sciences

SELECTION CRITERIA
• The applicant must have a stated interest and career goal in the Modeling & Simulation, Training and/or Education Industry.
• The award will be based on student merit as determined from the submitted application documents (see “How to Apply”).

CONDITION OF AWARD
• The scholarship must be used for education expenses (tuition, books, fees, room and board) and is subject to the established procedures/policies of the applicant’s institution.
• If the successful applicant terminates his/her graduate studies and there are remaining funds, the institution will retain such funds for award to another student of their choice following the above eligibility guidelines.
• The successful applicant will prepare an abstract and, if approved, a paper to be presented at I/ITSEC in the respective area of study one year after completion of the degree program or within three years of scholarship receipt, whichever occurs first.

SELECTION PANEL/SCHOLARSHIP ADMINISTRATION
A panel consisting of individuals from academia and I/ITSEC chairs will determine the selection. Administration of the scholarship program will reside with the National Training and Simulation Association (NTSA), an affiliate of the National Defense Industrial Association (NDIA).

HOW TO APPLY
Submit the following at https://www.iitsec.org/education/career-investment/scholarships no later than 23 June 2023.
1. Statement of how the scholarship will aid student in career pursuit (not more than 500 words). The synopsis must include a description on how the scholarship fits into the applicant’s planned career by incorporating the Modeling, Simulation, Training or Education field.
3. Personal resume to include positions, outstanding awards, publications (if any) and leadership capabilities. Ensure that your contact information (i.e. mailing address, phone and e-mail) is included.
4. Undergraduate transcript.
5. Graduate transcript (if applicable). Transcripts must be official.
6. Recommendations from major advisor and one professor from the aforementioned focus areas.
All registered runners will receive a custom race tech shirt, finishers race medal, race bib and official timing by Milestone Race Authority, and pre- and post-race refreshments. Tax-deductible registration.

**REGISTER BY 1 OCTOBER TO GET A SHIRT**

- **21 August – 1 October**
  (register by 1 October to secure your shirt) $40

- **1 October – 17 November**
  (shirts not guaranteed) $50

- **18 November – Onsite**
  (shirts not available) $60

**WEDNESDAY, 29 NOVEMBER 2023**

Earle L. Denton Memorial Golf Tournament
Organized by Central Florida Chapter NDIA • Sunday, 26 November OR Monday, 27 November

Shingle Creek
GOLF CLUB

Rosen Shingle Creek Golf Club
9939 Universal Blvd, Orlando, FL 32819 • 407-996-9933 • www.shinglecreekgolf.com

DEADLINES

Golf On-Line Registration 21 November
Sponsorship 18 November

TOURNAMENT TIME

Sunday 1100 Registration 1230 Shotgun
Monday 0630 Registration 0730 Shotgun

POINT OF CONTACT

Debbie Berry 407-748-3807 • debbie.berry@lmco.com

FEES

$100 per player (green fees, range balls, cart, lunch)
Coordinate club rentals directly with the Rosen Shingle Creek Golf Club pro shop.

SPONSORSHIPS

Details available at iitsec.org
Select hole, beverage cart, lunch, putting contest or a sponsorship package.
Fees start as low as $500.

SPONSORS

Send your logos via email to debbie.berry@lmco.com no later than 17 November. Do not bring your own sign.

*C Scholarships and additional qualified initiatives supported through tournament proceeds. For a full list of initiatives (STEM, etc.), contact Central Florida Chapter NDIA.

PAIRINGS & REQUESTS

Final assignments and pairings will be made by the tournament coordinator. Priority is based upon receipt of payment.

NOTE: To guarantee requested pairings, all golfers (two, three or four) MUST be entered during a single login session. Golfers registering separately MUST clearly specify pairing requests under comments. The tournament coordinator will attempt to honor all requests.

CANCELLATIONS

Must be received via email to debbie.berry@lmco.com by close of business 10 November to receive 50% refund. No refunds thereafter. Substitute golfers are permitted.

ON-LINE REGISTRATION

• Register and/or select sponsorship at https://www.iitsec.org/attend/registration-fees
• Register one to four players per login.
